Bespoke Mirrors

Why choose us for your mirror needs?

A great mirror manufactured to your requirements will utilise the light in any room and create the feeling of a light, open space.

From media units and feature walls to wardrobe doors and splashbacks, mirrored glass can transform almost any space in your home. Whatever the application, we cut and finish every mirror to your exact specification.

Did you know we can also supply demisting pads for mirrors to help keep them free of steam or condensation.

Spoilt for choice

We have a variety of mirror finishes in our range, including Silver, Bronze, Grey and Antique effects. We also offer two different types of edgework - a standard polish or a bevelled edge. We manufacture all mirrors to be custom-made to your needs. Whether they are large, small or an irregular shape, here at Clearglass, we're able to meet all your requirements.

Splashbacks

What makes our glass splashbacks the perfect choice?

At Clearglass, we make our bespoke splashback ordering process as easy as possible.

When designing your splashback, we're on hand to help every step of the way. Whether it's some advice on choosing the right colour for you, colour matching to an item or a branded paint colour, we'll try and make it as stress-free and simple as possible.

Expert advice on hand

With years of experience in glass splashback installation, our knowledgeable team is on hand to guide you through every decision. From panel sizing to finishes, our team bring practical expertise to every project, so you can be confident that every detail has been carefully considered and professionally handled.

All splashbacks are manufactured from low iron glass, which has a reduced green tint compared to standard glass. This gives you a clearer, more accurate colour finish, which is essential when colour matching to a specific paint or décor.

The maximum size of a splashback we can achieve in one panel is 4.2 metres. If accessibility is an issue, larger splashbacks can be split and joined on the advice of our surveyors to retain an attractive end product. This will be discussed with you at the templating stage. All edges will be polished; this gives the glass a neat, sleek finish.

Splashbacks installed behind the hob and all critical areas will be toughened, which makes it heat resistant up to 400°C, ensuring that it is ideal for all cooking areas. Glass is also more durable than tiles and much easier to keep clean. What's more, it never needs sealing and it won't ever stain as it's a non-porous material, this in turn makes glass one of the most hygienic options available.

Tailored to fit

With all our installations, we offer a templating service. We will visit you in your home or workplace to take measurements of the area to ensure the splashback is the perfect fit. We also suggest once you have decided on a colour or finish, you take a sample home so you can see how the colour will appear in the different lighting in your home.

We know how important the colour of your splashback is and want to make sure yours is perfect for you.

Huge range of styles

To see the full range of colours we have to offer, including our standard colour, image printed, mirror, metallic, galaxy and filament ranges, please visit our website for a guide or pop into our showroom to see a selection on display and to discuss all options with our expert team.

Image-Printed Splashbacks

With our splashbacks, we don't just provide colours, we also offer something a bit different. Have you ever thought about having an image printed on your splashback? This is a unique product that we can offer our customers. Choose from Marble, Stone, Wood or Metal look finishes or opt for a beach scene or your favourite family photo - the possibilities are endless.

Shower Enclosures

Looking for that perfect shower enclosure?

Finding the perfect shower screen or enclosure can add a luxurious touch to your bathroom. Glass screens and enclosures are a focal point in bathrooms and create a modern, sleek environment for you to relax in.

No matter what size or shape the area of your shower is, you shouldn't compromise when choosing your shower screen. This is why you can count on us to provide quality glass screens for your bathroom.

We can create and install bespoke bath and shower screens with a wide range of hardware and finishes to choose from. We also offer a frosted, tinted and patterned glass options to provide more privacy.

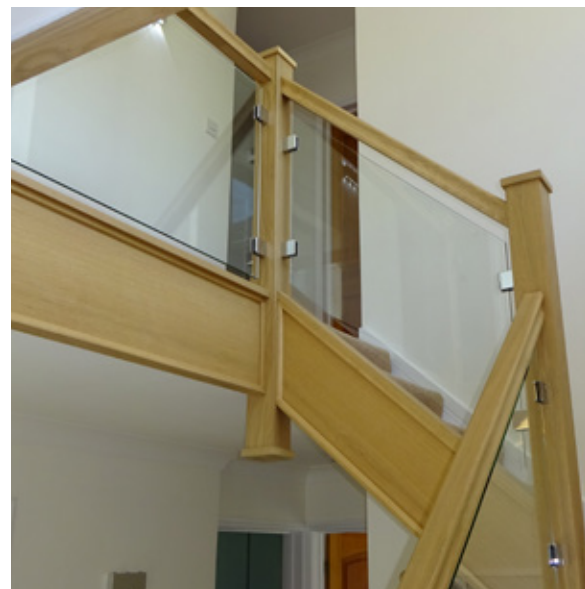

Bespoke Balustrades and Balconies

Glass is a great material for maximizing the look of the space and for giving a modern look to the environment. It retains the view, without compromising security or safety of the staircase, deck or balcony.

Make the most of your space with our expertly manufactured range of glass balustrade systems, suitable for both interior and exterior use. They can be used in commercial as well as domestic properties. To keep up with modern interior design styles, glass balustrades are an excellent way of adding elegance to any home or business.

With a vast range of styles and ranges on offer, our experienced team can guide you through what balustrade would be best for you.

Specialist Partitions

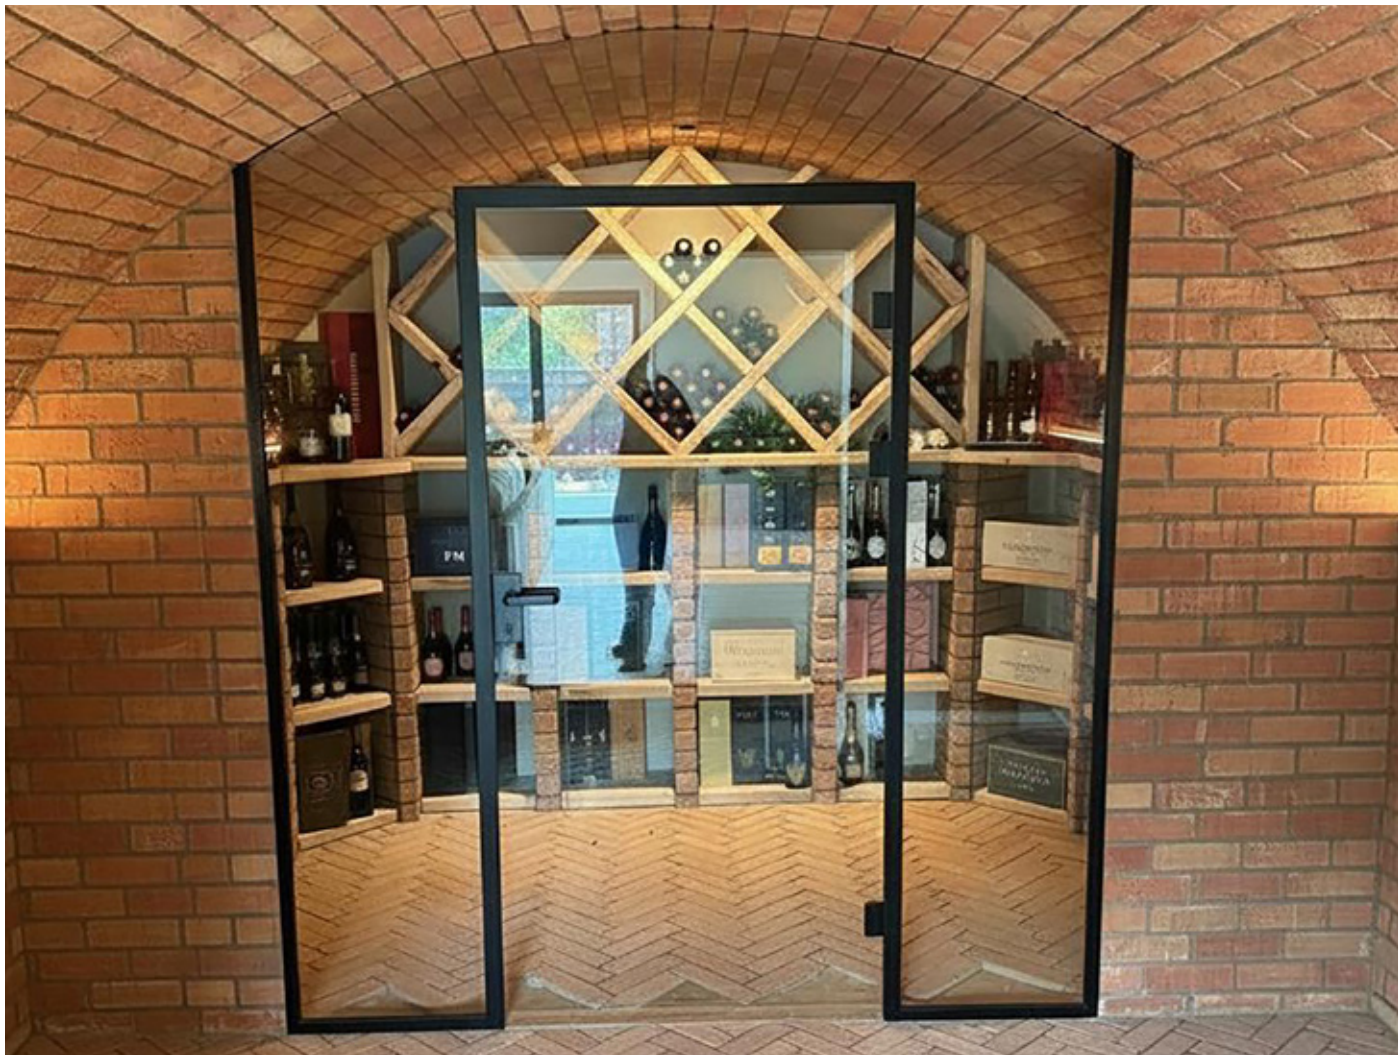

Glass partitions are a great way to allow natural light into your home or office. Whether it's separating your kitchen from your living room, or dividing up an office environment, we can supply sleek systems, custom made to suit your needs and requirements. Our partitions are a modern way to divide up a space in any way you wish.

There's a variety of different options available when choosing the right partition for you. Need more privacy? We offer tinted, sandblasted and satin options too. We can also apply logos or patterns to the glass.

The high-quality hardware we use gives our partitions a quality finish to every installation, with a range of colours and finishes available to complement your space — from sleek chrome and matte black to brushed steel and brass.

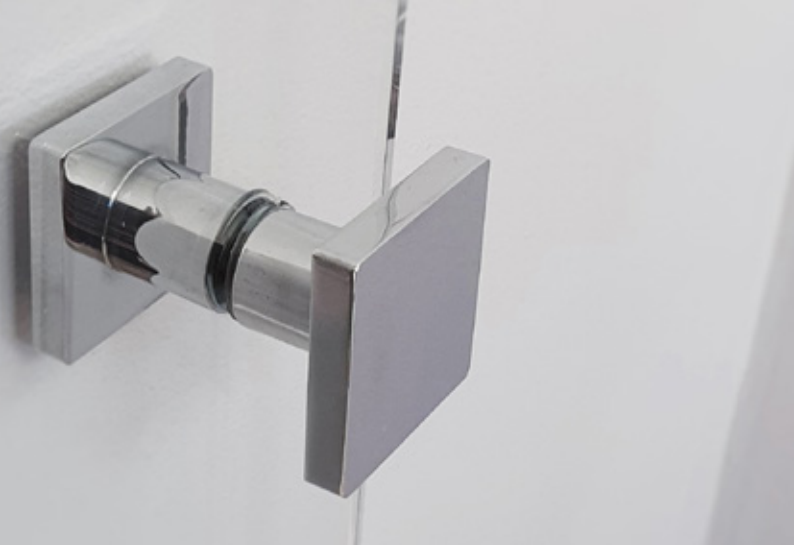

Enquire today to see how we can help you.

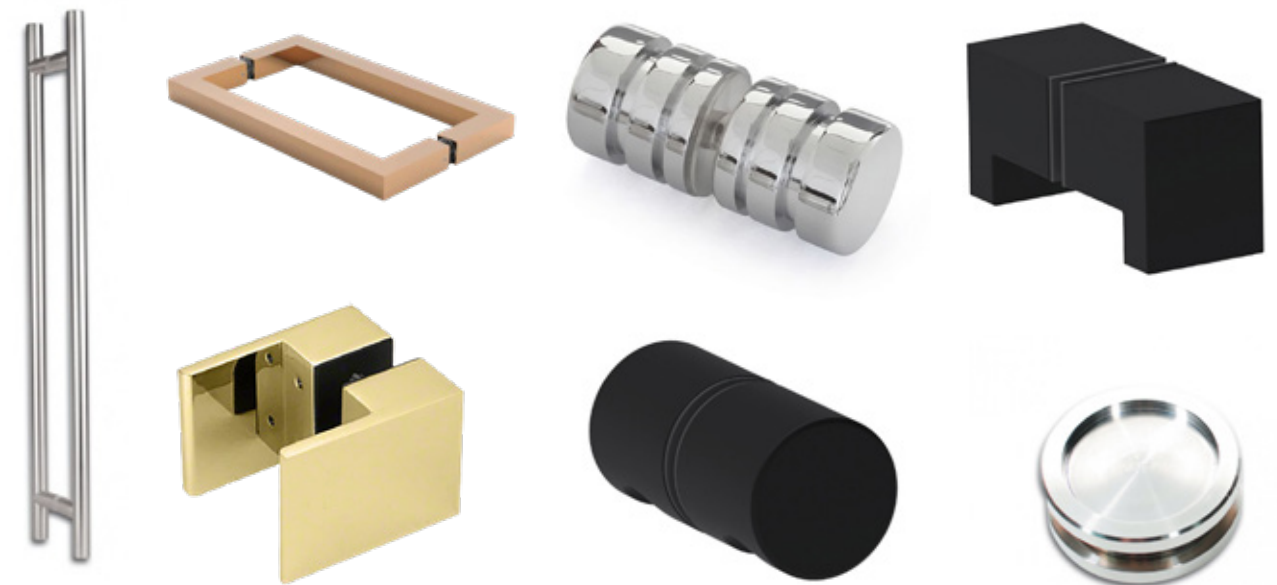

Glass Door Hardware

We have a wide range of hardware available for all types of doors, so they really are customised to fit your needs. Whether you choose a hinged door or a sliding door, the hardware we supply will be the perfect finish to complete the installation of your door. We can offer several different finishes including chrome, bronze, brushed satin and black.

Examples of hardware available

Our hardware is available in a choice of finishes. Please speak to our expert team to discuss options available.

Custom Glass Doors

Having a glass door separating the rooms in your home is a great way to spread the light and will make your home feel more spacious.

Depending on your requirements we can supply and install glass doors that are clear or if more privacy is required, frosted.

Fineo Vacuum Glazing

Luxury Glass, Engineered for Tomorrow

Fineo is the next generation of insulating glass, combining advanced vacuum technology with an ultra-slim 7.7mm profile to deliver the thermal performance of triple glazing and a U-value of just 0.7 W/m²K. Ideal for period and heritage properties, Fineo retrofits directly into existing timber sash frames, preserving the character of your home while dramatically improving warmth, comfort, and noise reduction — and allowing up to 15% more natural light than comparable glazing options.

Fully recyclable, manufactured in Europe, and backed by a 20-year warranty, Fineo is the sustainable choice for modern renovation. Clearglass is one of a select few specialist Fineo installers in the UK, offering a professional measure-and-fit service across Cambridgeshire and surrounding areas.

Glazing Solutions

Clear windows. Restored performance. Minimal disruption.

High-quality glazing that improves comfort, efficiency, and style. From upgrading existing windows to full performance replacements, we deliver precision-made solutions tailored to your home.

Failed & Misted Unit Replacement

When the seal around a double-glazed unit breaks down, moisture gets trapped between the panes causing that familiar foggy appearance. It also means your windows are no longer insulating properly, leaving your home colder and draughtier than it should be.

We simply remove the failed unit and install a new sealed replacement, manufactured to the exact dimensions of your existing frame. Your frames stay in place, disruption is minimal, and most replacements are completed within an hour.

Tailored to your property: Every unit is made to measure using quality components from trusted suppliers, ensuring a perfect fit and long-lasting performance across both modern and traditional properties.

Consider an Upgrade at the Same Time

Replacement is also a great opportunity to improve on what you had. We can fit A-rated, low-emissivity, or solar-control glass, reflecting heat back into your home to make it cooler and reduce glare — at no extra disruption.

Key Benefits

Keeps the heat in — advanced glazing helps retain internal warmth, reducing heat loss and lowering energy consumption throughout the year.

Reduces outside noise — improved insulation helps soften external sound, creating a calmer and more comfortable living environment.

Helps control condensation — enhanced thermal performance reduces internal moisture build-up, helping protect against damp and mould issues.

Lower energy use, lower emissions — by reducing heat loss, your home requires less energy to maintain temperature, helping reduce your carbon footprint and save you money.

Designed to suit your home — a wide range of styles and finishes available, allowing seamless integration with both modern and traditional properties.

A cost-effective alternative to full replacement — a fraction of the cost of full window replacement, with none of the disruption, damage risk, or redecoration that comes with it.

Fix the problem. Then make it better. From misted unit replacement to full energy-efficient upgrades, we deliver precision-made glazing solutions tailored to your home.

Built to last — all work is backed by guarantees of up to 10 years, giving you complete peace of mind in the quality and performance of your new glazing.

Secondary Glazing

Heritage-Friendly Insulation for Period Properties

Secondary glazing adds a slim inner pane to your existing windows, creating an insulating air gap that reduces heat loss, cuts external noise by up to 80%, and eliminates draughts — all without altering your original frames. It's the ideal solution for listed buildings, conservation areas, and period properties where conventional double glazing isn't an option.

A range of glass types are available to help with heat retention and noise reduction, so we can recommend the right option to suit your specific requirements.

Available in a range of styles, including hinged, sliding, and fixed, systems are made to measure and fully reversible. At Clearglass, we offer professional installation, as well as supply only options.

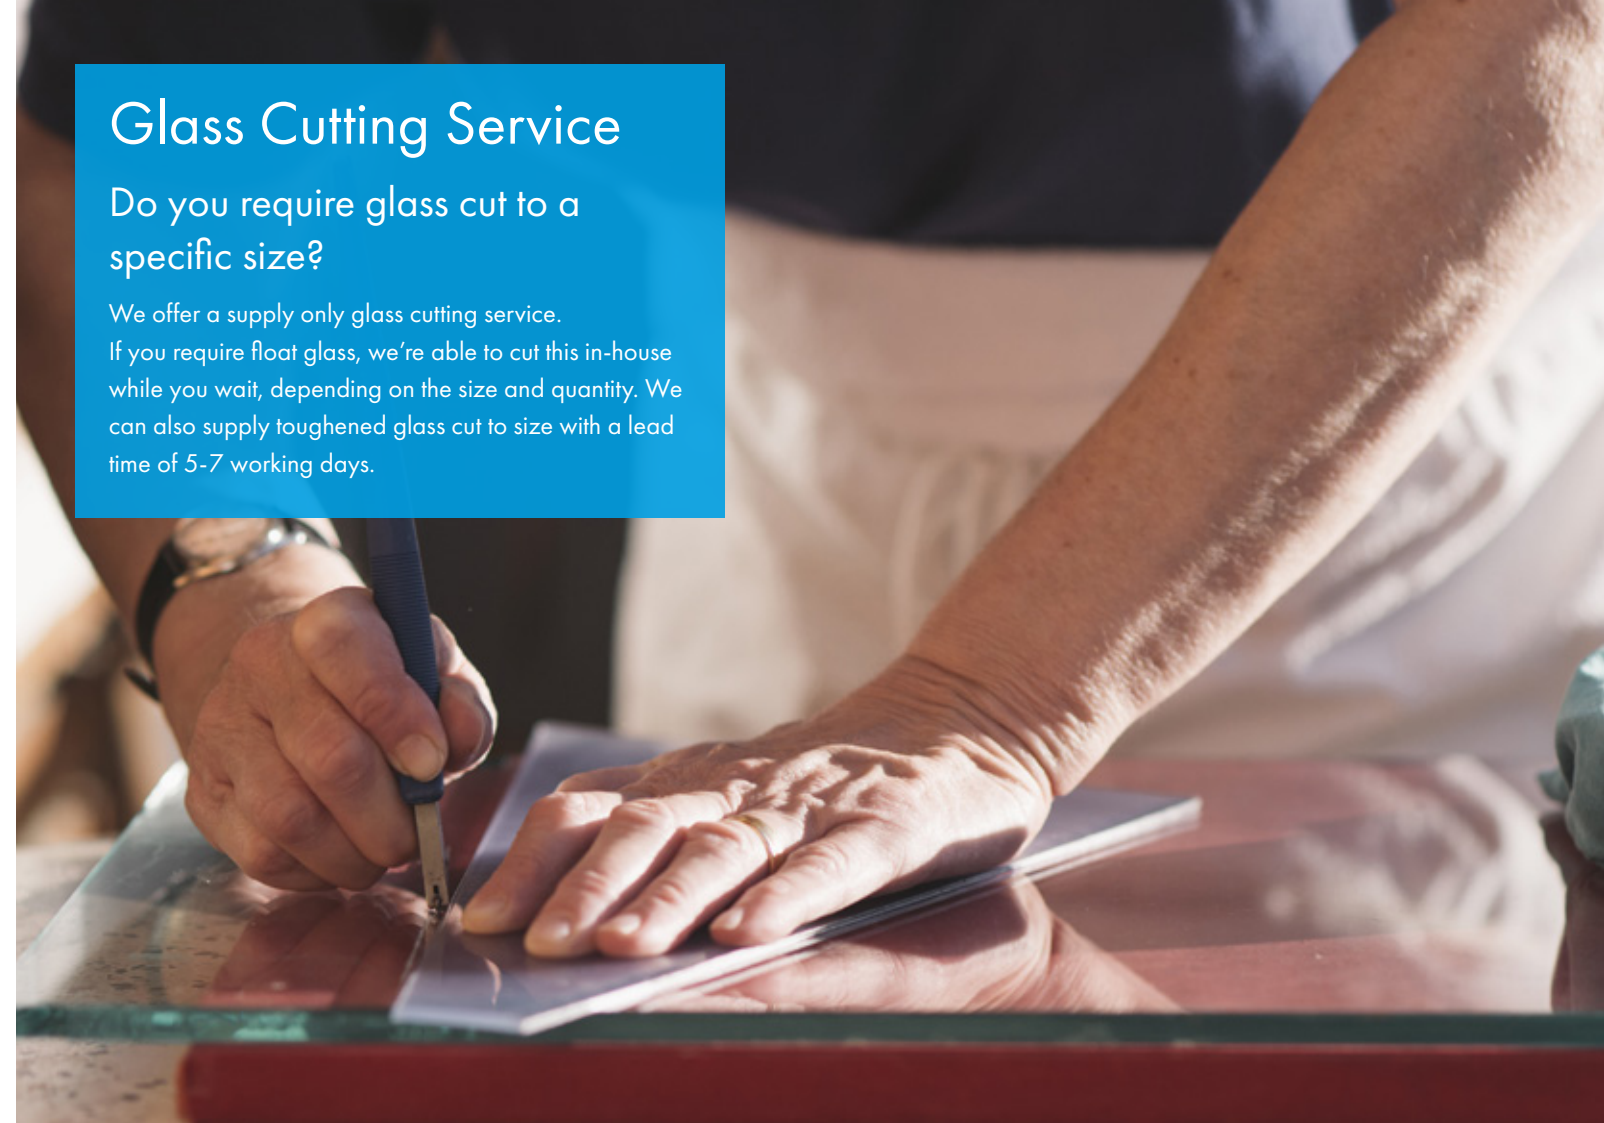

Glass Cutting Service

Do you require glass cut to a specific size?

We offer a supply only glass cutting service.

If you require float glass, we're able to cut this in-house while you wait, depending on the size and quantity. We can also supply toughened glass cut to size with a lead time of 5-7 working days.

UV Bonding

We use specialist UV bonding techniques to seamlessly join glass panels for a clean, frameless finish. Using a UV-cured adhesive, we create strong and durable bonds ideal for bespoke glass shelving, display cabinets, display boxes, furniture, and shower enclosures. The result is a sleek, modern appearance with minimal visible fixings.

Fire Glass

We supply a wide range of fire-resistant glass, from stove glass to regulation fire glass that meets current safety standards. Available as single panels or double glazed units. Contact our team to find out more.
